

Industrial Turntables

Years of experience make RHW an excellent choice for all your turntable needs.

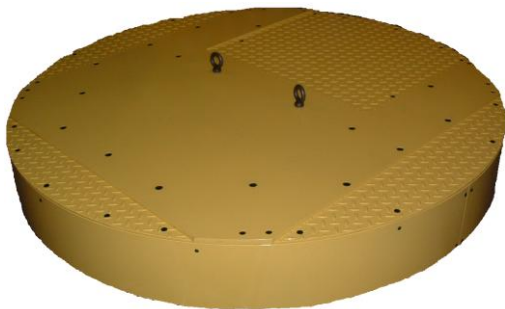

Industrial turntables are an excellent way to significantly improve speed and efficiency in factories, warehouses and in fact anywhere that some form of distribution occurs!

Built on a central bearing, these turntables provide an efficient and unobtrusive solution to industrial challenges.

Industrial Turntables are a Fantastic Solution:

- Our turntables are built with durability in mind - Capable of withstanding heavy industrial use.
- They are flexible in their installation able to be both portable and fixed.
- Very easy to use – with variable speed rotation available both clockwise and anticlockwise. Hand or foot operator control available.

**“Ideal for factory
component feeds and
other distribution
systems”**

RHW Engineering is able to manufacture bespoke turntables in a range of sizes to fit a variety of locations and vehicles.
